Re: Web Essentials

To whom it may concern;

The Town of Lockport and Town of Lockport Industrial Development Agency have been utilizing Web Essentials for our web hosting, web mail and website developing for the past 10 years.

They bring a level of professionalism we have not found with other such providers. The graphic presentation of their website design places our site among the best in the industry. We are proud to offer this letter of support for their services.

Our Community has approximately 20,000 residents. Keeping in contact with them is essential in our efforts to keep the community informed regarding all of our projects and programs. Web Essentials makes it effortless with multiple departments updating their section of our website right from their offices.

Web Essentials also helped us to create many community marketing materials. We have presented these brochures across the county at the International Council of Shopping Center events. The materials have been critically acclaimed by conference attendees as highly visual and effective in communicating our community assets to the retail industry.

If your organization wants a top quality internet experience for your customers. Web Essentials is the way to go!

Sincerely,

Marc R. Smith
Coordinator of Economic Development
Town of Lockport
(Former Town of Lockport Supervisor)
